

SEACOR Environmental Products

Part of the SEACOR Environmental Services family of companies, **SEACOR Environmental Products (SEP)** is a global leader in the provision of environmental and emergency response products and supplies. With its headquarters in Seattle USA, SEP employs current technologies and innovative products to help our clients achieve cost-effective solutions to their pollution prevention needs. Unlike individual manufacturers that may promote their particular products, SEP selects the most appropriate equipment from the many vendors with whom we have established relationships to provide the client with a customised, integrated and proven solution to fit their unique needs. We are continuously looking for new state-of-the-art products and have historically been well positioned to work with inventors and manufacturers to field test and improve their products. SEP's specialists are experienced in providing competitive solutions for environmental and regulatory challenges from the Arctic to the tropics.

Since 1973 SEP has been doing business under various names and has grown to become an industry leader as a provider of high-quality environmental products and response services. Individuals within SEP have over 30 years of continuous experience in the environmental and emergency response industry.

Our Products:

SEP manufactures a proprietary heavy duty containment boom (Petro Barrier) for permanent mooring, and is a distributor/agent for numerous manufacturers of a variety of high quality emergency response, maintenance, analytical, and best-management pollution prevention products. The following is a general non-inclusive listing of the types of products available through SEP:

- Oil Containment Boom
- Oil Skimming Systems
- Temporary Liquid Storage Tanks
- Maritime Security Barriers
- Oil & HAZMAT Sorbent Materials
- Oil Spill Response Vessels
- Personal Protective Equipment
- All Kinds of Ancillary Equipment

Our Services:

- Equipment selection and supply
- Facility equipment inspections
- Equipment installation & maintenance programmes
- Technical assistance
- Custom installations & on-site equipment testing
- R & D for new spill clean-up equipment
- On-site commissioning and training
- Spare parts coordination, purchase & supply

SEACOR Environmental Products

Our Experience:

Below are a few examples of the many projects undertaken by SEP:

- **2004-5 - Azerbaijan, Georgia and Turkey**

Acting as agent for a major oil industry project, SEP procured a wide range of oil spill response and support equipment including off-road vehicles and marine craft. SEP's tasks included tendering, selection, inspection, and shipping of the equipment to the Caspian region.

- **1975 through 2005 - Alaska, USA**

SEP personnel provided most of the response equipment and training during the construction and start up of the Alyeska pipeline in the mid-1970's. Through the years following start up, SEP personnel have provided the pipeline operating company with significant quantities of oil containment boom, recovery systems, updated training, spare parts and new products as necessary.

- **2003 - Nassau, Bahamas**

SEP designed, delivered, and built on site a custom permanent oil barrier boom to protect the resident dolphin population. SEP activities also included maintenance and initial responder training.

- **2001 - Louisiana & Texas, USA**

SEP provided oil pollution control equipment and training for 21 US Ready Reserve Fleet vessels stationed in the US, Guam and the Indian Ocean. This project involved SEP in the design of the spill control packages, the commissioning of the equipment on site and the training of the ships' crews and shore-based

personnel in the use of the equipment. SEP also provided digital training media for each vessel.

- **2000-2003 - Warri & Port Harcourt, Nigeria**

As part of a 3-year contract, SEP provided oil spill control equipment and training to a major oil company in Nigeria. The project included the supply of an oil containment boom (3 kilometres), oil skimmers, temporary liquid storage units and oil sorbent materials.

- **1999 - Istanbul, Turkey**

SEP provided oil skimming equipment packages and towable tanks to the Turkish maritime authorities for the protection of the Turkish Straits and coastal waters. Also provided was on-site commissioning and training after the goods were delivered and accepted by the client.

- **1994 - China**

SEP performed annual training services for oil spill clean-up and in-situ burning of oil on water. SEP provided the client with 300m of offshore fire proof containment boom along with annual training of the client's personnel, partners and contractors.
